DESCRIPTION

Laboratory instrument for determining the dimensional characteristic in the tiles (length, orthogonality, glide, warping, straightness of sides, curvature/bending of the sides). The measuring takes place by difference between the reference digital gauge calibration plate and the ceramic tiles. The instrument is designed for tiles from 80x80 up to 1600 x 1600 mm and thickness from 4 up to 15 mm.

TECHNICAL SPECIFICATIONS

- Digital gauge, accuracy 0,01 mm
- Measuring dimensions: from 80x80 up to 1600 x 1600 mm
- Measuring thickness: from 4 up to 15 mm

EQUIPMENT

- 6 analogical gauges readability 0,01 mm
- Kit supports for tiles thickness from 4 up to 15 mm
